Introduction

According to archeological finds, clay pot cookery can be traced back thousands of years, when food in an earthenware pot was put in the glowing ashes of an open fire.

The Romans, lovers of good wine and good food, used pots made of a special type of earthenware. The Romertopf is made using similar types of clay.

This special porous clay is unglazed, allowing it to breathe during the cooking process.

Food cooked in a clay pot requires no liquid unless specifically called for in a recipe. The result incorporates all-natural juices, the full flavor and taste, and all the essential nutrients and vitamins are retained.

Cook all types of foods without adding any fat.
Directions for Use & Care

Before using the first time, wash thoroughly with hot water. Do not use soaps. Rinse well, then completely immerse in water and soak both the top and the bottom for about 15 minutes.

Before each time you use it, after the first time, rinse the inside of both the base and the lid under cold tap water. Pour off the excess liquid.

After adding all the ingredients, place your Romertopf in the center of a cold oven.

Do not add cold liquids once the Romertopf is hot.

Regular recipes usually can be converted for clay pots by increasing the cooking temperature by 100° F, and deducting one-half hour of cooking time.

Romertopf is ideal for the microwave. Because microwave ovens vary to such a great degree, use the oven manufacturer's guidelines for cooking times.

To keep it in top condition for many, many years, take care not to shock it by moving it from one extreme temperature to another.

Use mitts or pot holders to move it when it is hot, and place it on a trivet, mat or folded dishtowel when moving it out of the oven.

Cleaning is a snap. Use hot water only, and a stiff natural bristle or nylon brush, or a nylon scouring pad to clean after each use. Do not use soaps; a little baking soda will cut any grease. And never use cold water when the Romertopf is hot.

When not in use, keep the Romertopf in a place where the air circulates. Place lid upside down on top of base when storing, to allow air to circulate inside the bottom of the roaster.

Don't use the Romertopf on an open flame or hot cooking plate. It is designed for oven and microwave use only.

Use one Romertopf for fish and a separate one for meats, to keep the flavors separate.
Hints and Tips:

- Ingredients which cook quickly should be cut into larger pieces than slow cooking foods.
- Place dry materials, such as rice or lentils, in the bottom of the pot and cover them with liquid.
- Cook on the bottom shelf (or next to bottom) of your oven. This will ensure the heat above and below the Romertopf is equalized.

Pheasant

Roast Chicken & Peppers

Serves 6
1.6 kg (3-1/2 lbs) oven ready chicken
200 g (7 oz) small onions
1 small red pepper, deseeded and sliced
1 small green pepper, deseeded and sliced
1 garlic clove
100 g (4 oz) baby sweet corn
100 g (4 oz) button mushrooms
100 g (4 oz) mange-tout (or French or runner) beans
15 ml (1 tbsp) tomato puree
Salt and freshly ground black pepper
3-4 sprigs of fresh thyme (or 1 tsp dried thyme)
150 ml (6 oz) red wine or chicken stock
Corn flour

Soak the Romertopf.
Place the chopped garlic, sprig of thyme and salt and pepper inside the chicken.
Place chicken in the Romertopf and surround with onions, peppers and more sprigs of thyme and salt and pepper.

Place in a cold oven and cook at 200°C (400°F, Gas Mark 6).
Remove the pot from the oven and add sweet corn, sliced mushrooms and mange-tout and cook for a further 30 minutes.
Remove the chicken and vegetables and keep warm.
Strain off the sauce, reduce if necessary.
The amount of sauce can be increased by adding 100 ml (5 fl oz) of chicken stock to the sauce and thickening with 10-15 ml (2-3 tsp) corn flour dissolved in 45 ml (3 tbsp) cold water. Whisk well until the sauce is brought to the boil and thickens.
Adjust seasoning and serve with the chicken and vegetables.
Boiled new potatoes, sprinkled with chopped parsley, are a delicious complement to this meal.

Editor’s Note: The original recipe does not indicate cooking time. As a rule of thumb, chicken should be cooked until the internal temperature (measured in thick-meat areas and away from bone) should be 165-180°F. Another common recommendation is to cook poultry about 20 minutes per pound. Therefore, my recommendation is to cook the chicken for about an hour, before adding the corn, mushrooms and mange-tout.
